## Wilderness Protection in Polar Regions

Arctic Lessons Learnt for the Regulation and Management of Tourism in the Antarctic

AutorIn: Antje Neumann

Antarctica's wilderness values, even though specifically recognized by the Environmental Protocol to the Antarctic Treaty, are rarely considered in practice. This deficiency is especially apparent with regard to a more and more increasing human footprint caused, among others, by a growing number of tourists visiting the region and conducting a broad variety of activities.

On the basis of a detailed study of three Arctic wilderness areas – the Hammastunturi Wilderness Reserve (Finland), the Archipelago of Svalbard (Norway) and the Denali National Park and Preserve (Alaska, United States) – as well as the relevant policies and legislation in these countries, **Antje Neumann** identifies numerous 'lessons learnt' that can serve as suggestions for improving the protection of wilderness in Antarctica.

Leserschaft

All involved in Antarctic and Arctic law; those concerned with the Polar tourism issues; 'Protected Areas' practitioners such as park managers, rangers, guides, and representatives of competent authorities.
